

**EXTRA-CURRICULAR STUDENT CLUB ACTIVITIES
IN SCHOOL DISTRICT FACILITIES**

School District facilities may be used for student clubs and activities. Such clubs and activities need not be directly related to school educational programs but cannot be detrimental to the objectives, goals or standards of the school or community.

1. The School Principals must approve all clubs or activities that use school facilities. The Superintendent (or designate) will do so if the School Principal is not available or the location is the School Board Office. The School Principals or Superintendent (or designate) will specify the conditions whereby the club or activity will operate.
2. The School Principal or Superintendent (or designate) may seek the guidance of the Board or a Parents' Advisory Council when such guidance could help to determine the appropriateness of the club or activity in the facilities. Such guidance will be sought when the club or activity has religion or politics as the focus of interest.
3. The decision of the School Principal or Superintendent (or designate) to sanction, or not to sanction, any student or community club or activity can be appealed to the Board.
